DETAILED ACTION

Drawings

1. Figures 1-5 and 8 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jordan et al (5,751,139) in view of acknowledged prior art.

10/576,553

Art Unit: 2838

Jordan et al discloses a voltage converter comprising: an inductive circuit (L) for storing energy during an inductive magnetizing mode and transferring energy during an inductive demagnetizing mode; at least two non-inverting branches for providing at least two non-inverted output voltages (V1, V2, V3,...)) and an inverting branch for providing an inverted output voltage (Vn); the inverting and non-inverting branches being parallely coupled to an output of the inductive circuit the inductive circuit being arranged to transfer energy to the inverting branch and to one of the at least two non-inverting branches, wherein the inverted voltage and the corresponding non-inverted output voltage of the one of the at least two non-inverting branches are having an opposite polarity (see figures 1, 10, and 11). But Jordan et al fails to discloses the inverted voltage and the corresponding non-inverted output voltage of the one of the at least two non-inverting branches are having a substantially equal magnitude. The acknowledged prior art (at page 6, lines 13-15), however, clearly teaches that the use of such feature is well known in the art. Thus, it would have been obvious to one having ordinary skill in the art to employ having substantially equal magnitude of inverting and non-inverting outputs in Jordan et al, as taught by the acknowledged prior art, in order to obtain the claimed invention for the purpose of generating the desired regulated output voltage.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's 4. disclosure. Sluijs (6,437,545 and 6,636,022) and Nishimori et al (6,900,620) teach the use of multiple output DC/DC converter control system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. J. Han whose telephone number is 571-272-2078. The examiner can normally be reached on Mon-Fri 6:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on 571-272-2208. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
